

# BigSpatial 2022

Proceedings of the 10<sup>th</sup> ACM SIGSPATIAL  
International Workshop on Analytics for  
Big Geospatial Data  
(BigSpatial 2022)

Nov 1, 2022, Seattle, WA, USA

**Editor(s):**

Ashwin Shashidharan, Esri, CA, USA

Krishna Karthik Gadiraju, Juniper Networks, CA, USA

Varun Chandola, State University of New York at Buffalo, NY, USA

Ranga Raju Vatsavai, North Carolina State University, NC, USA

## FOREWORD

Big data is an important area of research for data researchers and scientists. This area has seen significant interest from the industry and federal agencies alike in the past decade. Within the realm of big data, spatial and spatio-temporal data are still one of fastest growing types of data. With advances in remote sensors, sensor networks, and the proliferation of location sensing devices in daily life activities and common business practices, the generation of disparate, dynamic, and geographically distributed spatiotemporal data has continued to explode in recent years. In addition, significant progress in ground, air and space-borne sensor technologies has led to an unprecedented access to earth science data for scientists from different disciplines interested in studying the complementary nature of different parameters. Analysis of this data poses new challenges to researchers.

The 10<sup>th</sup> workshop on Analytics for Big Geospatial Data (BigSpatial '22) builds on the success of the previous nine editions to bring together researchers from academia, government and industrial research labs that are working in the area of spatial analytics with an eye towards massive data sizes. The main motivation for this workshop stems from the increasing need for a forum to exchange ideas and recent research results, and to facilitate collaboration and dialog between academia, government, and industrial stakeholders. The workshop continues to provide a platform for researchers and practitioners engaged in addressing the big data aspect of spatial and spatio-temporal data analytics to present and discuss their ideas.

This year we received 14 technical submissions out of which 5 were selected for full presentations. The technical program also consisted of two invited talks. We hope that the BigSpatial workshop will continue to provide a leading international forum for researchers, developers, and practitioners in the field of data analytics for big geospatial data to identify current and future areas of research.

Ashwin Shashidharan, Esri, CA, USA

Varun Chandola, State University of New York at Buffalo, NY, USA  
Ranga Raju Vatsavai, North Carolina State University, NC, USA

## ACKNOWLEDGEMENTS

We would like to thank the authors of all submitted papers. Their innovation and creativity have resulted in a strong technical program. We are highly indebted to the program committee members, whose reviewing efforts ensured in selecting a competitive and strong technical program. We would like to express our sincere gratitude to the invited speakers.

## ORGANIZERS

### WORKSHOP CHAIRS

**Ashwin Shashidharan**, Esri, CA, USA

**Krishna Karthik Gadiraju**, Juniper Networks, CA, USA

### STEERING COMMITTEE

**Varun Chandola**, State University of New York at Buffalo, NY, USA

**Ranga Raju Vatsavai**, North Carolina State University, NC, USA

### PROGRAM COMMITTEE

**Alexandre Sorokine**, Oak Ridge National Laboratory

**Nicolas Meger**, Université de Savoie

**Alessandra Raffaeta**, Università Ca' Foscari Venezia

**Surya Durbha**, Indian Institute of Technology Bombay

**Anthony Filippi**, Texas A&M University

**Fusheng Wang**, Stony Brook University

**Arie Croitoru**, George Mason University

**Kuldeep Kurte**, ORNL

**Emre Eftelioglu**, Amazon

**Bharathkumar Ramachandra**, Geopipe Inc

**Mandar Chaudhary**, eBay Inc

**Zexi Chen**, Google Inc

**Mai Dahshan**, University of North Florida

**Samriddhi Singla**, University of California, Riverside

**Gurneet Kaur**, Esri

**Xu Teng**, Iowa State University

## SPONSORS

## Table of Contents

<b>AtlasHDF: An Efficient Big Data Framework for GeoAI .....</b>	<b>1</b>
<i>Martin Werner, Hao Li</i>	
<b>GEAR: A Graph Edge Attention Routing Algorithm Solving Combinatorial Optimization Problem with Graph Edge Cost .....</b>	<b>8</b>
<i>Yuhei Senuma, Zhao Wang, Yuusuke Nakano, Jun Ohya</i>	
<b>RING-Net: Road Inference from GPS Trajectories using a Deep Segmentation Network .....</b>	<b>17</b>
<i>Emre Eftelioglu, Ravi Garg, Vaibhav Kango, Chintan Gohil, Amber Roy Chowdhury</i>	
<b>Real-Time Spatial Registration for 3D Human Atlas .....</b>	<b>27</b>
<i>Lu Chen, Dejun Teng, Tian Zhu, Jun Kong, Bruce W. Herr II, Andreas Bueckle, Katy Börner, Fusheng Wang</i>	
<b>CSCD: Towards Spatially Resolving the Heterogeneous Landscape of MxIF Oncology Data .....</b>	<b>36</b>
<i>Yan Li, Majid Farhadloo, Santhoshi Krishnan, Yiqun Xie, Timothy L Frankel, Shashi Shekhar, Arvind Rao</i>
